

**World Day of Immunology
Public Lecture**

Evolution of the Immune System – the show goes on

**Immunologist Dr Alex McLellan and
Gastroenterologist Dr Michael Schultz**

will discuss evolution of the immune system in health and disease and the effects of a poorly adapted immune response in otherwise healthy people, using Inflammatory Bowel Disease as an example.

The University of Otago is actively researching inflammation and the changing needs of a good immune response. This lecture will highlight the cutting edge research being performed right here.

Wednesday 29 April 2009

5.30pm refreshments, 6.00pm lecture begins
