| 10   | Australasian Society for Immunology members |

---

ASI website:  
www.immunology.org.au
The Australasian Society for Immunology was created by the amalgamation in 1991 of the Australian Society for Immunology, formed in 1970, and the New Zealand Society for Immunology, formed in 1975. The aim of the Society is to encourage and support the discipline of immunology in the Australasian region. It is a broadly based Society, embracing clinical and experimental, cellular and molecular immunology in humans and animals. The Society provides a network for the exchange of information and for collaboration within Australia, New Zealand and overseas.

Membership of Societies

ASI maintains membership of the following Societies:

• The **International Union of Immunological Societies** (IUIS) is an umbrella organization for many of the regional and national societies of immunology throughout the world. As articulated in its *Constitution*, the objectives of IUIS are: (1) to organize international co-operation in immunology and to promote communication between the various branches of immunology and allied subjects; (2) to encourage within each scientifically independent territory co-operation between the Societies that represent the interests of immunology; and (3) to contribute to the advancement of immunology in all its aspects.

ASI is currently one of 54 Member Societies of IUIS, many of which belong to one of four Regional Federations encompassing Europe, Latin America, Africa and Asia-Oceania. Links with other international scientific bodies are promoted through the International Affiliate Members of IUIS, membership of the International Council for Science and formal liaison with the World Health Organization. Website: http://www.iuisonline.org/

• **Federation of Immunological Societies of Asia-Oceania** (FIMSA) is affiliated to the International Union of Immunological Societies (IUIS) and its role is to foster the development of immunology in the region. ASI is a Founding Member of the Federation that was formed in 1992. Website: http://www.fimsa.org/

• The **Australian Society for Medical Research** (ASMR) is a professional society representing Australian health and medical research. The Society has a long established role in public, political and scientific advocacy. ASI is one of its 46 affiliated professional societies and Medical Colleges. This represents 18,000 people actively involved in health and medical research. Website: http://www.asmr.org.au/

• The **Australian and New Zealand Council for the Care of Animals in Research and Teaching** (ANZCCART) was established in response to the need for scientists and teachers and Animal Ethics Committee members to be comprehensively informed of technical and ethical issues relating to the use of animals in research and teaching. ANZCCART is supported principally by the Australian Vice-Chancellors Committee (AV-CC), the Australian Research Council (ARC), the Commonwealth Scientific and Industrial Research Organisation (CSIRO), the National Health and Medical Research Council (NHMRC) and the Royal Society of New Zealand (RSNZ). ASI is a Professional Biomedical Society member of ANZCCART. Website: http://www.adelaide.edu.au/ANZCCART/
